Location:	SAVSKI VENAC, Savamala	Publ. (upd.):	17.02.2025

Description:

BW King's Park Residences is designed as a 15-story residential building, with shops and cafes on the ground floor, and two levels of underground parking with 275 parking spaces for residents. It consists of 233 apartments of various structures - from one-bedroom to four-bedroom units, as well as two-and-a-half-bedroom apartments. Each apartment has a terrace and high windows, from which, depending on the orientation, there is an exceptional view of the Sava Park, the inner courtyard or the city panorama. Each room has a multi-split air conditioning system, while the outdoor unit is located on the terrace and is covered with a decorative mask.

Infrastructure

BW King's Park Residences is a new residential building located in a green oasis. Savski Park is an extension of the building, while on the other side there is a landscaped inner courtyard intended for residents. Such a microlocation is rarely found in an urban environment and is an exceptional advantage for everyone who leads an active and healthy life. In addition to recreational and leisure facilities, such as a jogging track, a multifunctional sports field, a picnic area or an innovative children's playground in Savski Park, residents have shops, restaurants and cafes on the ground floor of the building just a few steps from their apartment, as well as a school and kindergarten in the immediate vicinity. Not far from the building there will also be a metro station where both future city lines will intersect.
